Ai

ment tools that favor men in industries where they already dominate.

"There's this myth that algorithms are these neutral, objective things," said Aaron Rieke, managing director at advocacy group Upturn. "Machine learning picks up patterns in society — who does what, who buys what, or who has what job. Those are patterns shaped by issues we've been struggling with for decades."

President Donald Trump's administration is also taking notice and has made the development of "safe and trustworthy" algorithms a major objective of the White House's new AI initiative. But it would do so mostly by strengthening an existing industry-driven process of creating technological standards.

"There's a need for greater transparency and data comparability," and for detecting and reducing bias in these systems, said Commerce Undersecretary Walter Copan, who directs the National Institute of Standards and Technology. "Consumers are essentially flying blind."

Dozens of facial recognition developers, including brand-name companies like Microsoft, last year submitted their proprietary algorithms to Copan's agency so that they could be evaluated and compared against each other. The results showed significant gains in accuracy over previous years.

But Wyden said the voluntary standards are not enough.

"Self-regulation clearly has failed here," he said.

Bones

Continued from front page

They dubbed the creature *Homo luzonensis*.

It apparently used stone tools and its small teeth suggest it might have been rather small-bodied, said one of the study authors, Florent Détroit of the National Museum of Natural History in Paris.

H. luzonensis lived in eastern Asia at around the same time as not only our species but other members of the *Homo* branch, including Neanderthals, their little-understood Siberian cousins the Denisovans, and the diminutive "hobbits" of the island of Flores in Indonesia.

There's no sign that *H. luzonensis* encountered any other member of the *Homo* group, Detroit said in an email. Our species isn't known to have reached the Philippines until thousands of years after the age of the bones, he said.

But some human relative was on Luzon more than 700,000 years ago, as indicated by the presence of stone tools and a butchered rhino dating to that time, he said. It might have been the newfound species or an ancestor of it, he said in an email.

Detroit said it's not clear how *H. luzonensis* is related to other species of *Homo*. He speculated that it might have descended from an earlier human relative, *Homo erectus*, that somehow crossed the sea to Luzon.

Abortion

ured court will overturn or weaken *Roe*, as abortion foes are hoping: "Over 45 years, the court has had different compositions, and we've always gotten the same answer."

Michael New, an abortion opponent who teaches social research at Catholic University of America, warned that it is impossible to predict what the court will do but said Kavanaugh's appointment "gives pro-lifers hope that legislation which offers more comprehensive protection to the unborn will receive a sympathetic hearing."

Some anti-abortion groups have declined to endorse the heartbeat bills, signaling doubts about their prospects. Texas Right to Life has instead endorsed bills that would curtail late-term abortions and ban abortions based on a fetus' race, gender or disability.

If the Supreme Court ever did overturn *Roe v. Wade*, states would presumably be left to decide for themselves whether abortion would be legal.

The renewed challenges come as the number of abortions performed in the U.S. has steadily declined since reaching a peak of 1.6 million in 1990. The latest 50-state tally was 926,000 in 2014, according to the Guttmacher Institute, a research group that supports abortion rights.

The heartbeat bills in particular have alarmed many women.

After Kentucky's governor signed the heartbeat bill, and before it was blocked, "we could feel the fear," said Marcie Crim of the Kentucky Health Justice Network, which runs a fund supporting Kentuckians who opt to get abortions.

"We had so many phone calls from people trying to save up the money for their procedure," Crim said. "They were thinking they were safe and could go get this done, and all of a sudden it was snatched away from them."
