DAILY COURT REVIEW

Trump

Continued from front page

Candidates representing the Democrats' moderate and progressive wings are yanking the party in opposing directions while offering conflicting messages about how to overcome their acute political shortcomings, Biden's weak standing chief among them. History suggests that Democrats, as the party that controls Washington, may be headed for big losses in November no matter which direction they go.

But as Democrats engage in passionate debates over policies, Republicans are waging deeply personal and expensive attacks against each other that are designed, above all, to win over Trump and his strongest supporters.

Florida Sen. Rick Scott, who leads the GOP's effort to retake the Senate, described the month of May as a brutal sorting period likely to be dominated by Republican infighting instead of the policy solutions or contrasts with Democrats he'd like to see.

"The primaries too often become sort of character assassinations," Scott said in an interview. "That's what has happened."

He added, "Hopefully, people come together."

No race may be messier than the Republican primary election for Georgia's governor. Trump has spent months attacking Republican incumbents Gov. Brian Kemp and Secretary of State Brad Raffensperger. He blames both men for not working hard enough to overturn his narrow loss in 2020 presidential election.

said. "For those people that want to engage with us securely, this is the way to do it."

Launched in 2019, the CIA's darknet site is accessible through the Tor browser. Tor, short for "The Onion Router," routes internet traffic through multiple third parties to mask a user's identity and destination. After downloading the Tor browser, the user typically inputs a long string of characters followed by ".onion."

Using Tor strips away cookies and many other means of tracking the typical internet user. And while no form of communication is completely secure at all times, intelligence officers say a potential tipster will be better protected on the darknet from Russian snooping.

Tor was originally created with support from the U.S. Naval Research Laboratory and run by a nonprofit since 2006. It has long been used by those seeking extra privacy: dissidents in authoritarian countries and people seeking to circumvent firewalls and censors, law enforcement and intelligence officers, and journalists including at The Associated Press, which operates its own tips drop box on Tor. It can be used by anyone seeking extra privacy. It has also been exploited by criminals.

Russians have long had to find ways to circumvent government blocks on the internet. In response to the Kremlin's crackdown since the war began, some media outlets and Twitter have promoted usage of their own ".onion" sites or the use of virtual private network software.

While officials would not disclose specifics, U.S. intelligence can be safely assumed to be working inside Russia. Calling attention to the darknet site now promotes to prospective contacts that the CIA is paying attention to their safety, said Mark Kelton, who retired from the CIA in 2015 after serving as chief of counterintelligence.

tion staffing considerations, Lee said in a statement.

"I review each death penalty case and believe it is an appropriate punishment for heinous crimes," Lee said. "However, the death penalty is an extremely serious matter, and I expect the Tennessee Department of Correction to leave no question that procedures are correctly followed."

The pause will remain in effect through the end of the year to allow time for the review and corrective action, Lee said.

Henry said last week that the night before the execution, she requested the results of the tests for potency, sterility and endotoxins but received no response. Henry suspects at least two of the three execution drugs were compounded, rather than commercially manufactured, she said, although secrecy rules surrounding Tennessee executions makes it difficult to know for certain.

After a public outcry several years ago, many drug manufacturers refused to sell their medications for executions, making the drugs difficult for prison systems to obtain. Tennessee and many other states also began approving exemptions to open records laws, shrouding the identity of drug suppliers and other information about executions in secrecy.
