## Shaken baby syndrome

Continued from front page

injury caused when a child's head is injured through shaking or some other violent impact, like being slammed against a wall or thrown on the floor, usually by an adult caregiver, said Dr. Suzanne Haney, a child abuse pediatrician and member of the American Academy of Pediatrics Council on Child Abuse and Neglect.

The term was changed in 2009 to abusive head trauma, a more inclusive diagnosis, Haney said.

There are about 1,300 reported cases of shaken baby syndrome/abusive head trauma in the U.S. each year, according to the National Center on Shaken Baby Syndrome.

What is the debate over shaken baby syndrome?

Critics allege doctors have been focused on concluding child abuse due to shaken baby syndrome whenever a triad of symptoms — bleeding around the brain, brain swelling and bleeding in the eyes — was found. Critics say doctors have not considered that things like short falls with head impact and naturally occurring illnesses like pneumonia, could mimic an inflicted head injury.

Roberson's attorneys and other supporters are not saying that child abuse doesn't exist or that shaking a baby is safe, said Kate Judson, executive director of the Center for Integrity in Forensic Sciences, a Wisconsin-based nonprofit that seeks to improve the reliability of forensic science evidence.

"This is a case about whether someone was misdiagnosed and justice wasn't served," Judson said.

While Haney declined to comment on Roberson's case, she said there is no disagreement within a vast majority of the medical community about the validity and science behind the diagnosis.

Haney said doctors are not just focused on a triad of symptoms to determine child abuse, but instead look at all possible things, including any illnesses, that could have caused the injuries.

"I worry the pushback against abusive head trauma as a diagnosis is going to interfere with the prevention efforts that are out there and therefore allow more children to get harmed," Haney said.

Judson said she believes that doctors in Roberson's case did not consider all possible causes, including illness, to explain what happened to his daughter and used the triad of symptoms to only focus on child abuse.

What are the concerns Roberson's supporters are raising?

## Migrant deaths

Continued from front page

"We'd always had three deputies down in that area, and I think we have nine or 10 now," Edgar said of New Mexico's eastern migration corridor.

Immigration and border security are among voters' top concerns heading into the Nov. 5 presidential contest, but the candidates have focused on keeping migrants out of the U.S. and deporting those already here.

The increase in deaths is a humanitarian concern for advocates as smugglers guide migrants into New Mexico through fencing gaps at the border city of Sunland Park and over low-lying barriers west of the nearby Santa Teresa Port of Entry.

"People are dying close to urban areas, in some cases just 1,000 feet from roads," noted Adam Isacson, an analyst for the non-governmental Washington Office on Latin America. He said water stations, improved telecommunications and more rescue efforts could help.

New Mexico officials are targeting human-smuggling networks, recently arresting 16 people and rescuing 91 trafficking victims. U.S. Customs and Border Protection added a surveillance blimp to monitor the migration corridor near its office in Santa Teresa, in New Mexico's Doña Ana County. Movable 33-foot (10-meter) towers use radar to scan the area.

What changed on Monday?

Now, Canada says that India's top diplomat in the country is a person of interest in the killing, and that police have uncovered evidence of an intensifying campaign against Canadian citizens by agents of the Indian government.

The Royal Canadian Mounted Police said it had found evidence of the involvement of Indian agents "in serious criminal
